Hello Delegates!

Welcome to the United Nations Framework Convention on Climate Change Conference of the Parties (UNFCCC COP)! My name is Carlos Ramos, and I will be your Director for Session I of NHSMUN 2027. I was born and raised in Monterrey, one of the largest cities in México. I am a senior at Instituto Tecnológico de Monterrey, majoring in data science and mathematics. I also did the International Baccalaureate Diploma Program in high school. Outside of school, I love reading, film photography and old cameras, playing and watching tennis, and going to the movies. I also enjoy traveling and have been documenting my trips these past few years. Finally, I love a good cup of coffee and got into specialty pour-over about a year ago.

I started my nine-year Model UN career during my second year of middle school. Through middle school and high school, I attended over a dozen local conferences and a couple of international ones as a delegate. I traveled to San Antonio, Texas, for MUNSA at Trinity University, and attended a virtual edition of HNMUN LA in 2020. After the pandemic ended, I mainly focused on staffing conferences back home in Monterrey. For my high school's MUN, I chaired several crisis and special committees, and then had the opportunity to be a part of the senior staff as a Chief of Staff in 2022. Currently, I am an exchange student at the University of Sydney and joined their Model UN club. Even though I love debating, I have always been passionate about staffing and participating in conferences behind the scenes. Two years ago, I got accepted into the NHSMUN staff as an Assistant Director for the Social, Cultural, and Humanitarian (SOCHUM) committee. Throughout my time in NHSMUN, I have not only grown as a person and gained soft and hard skills that I use in my day-to-day life, but I have also met some of the most passionate, skilled, smart, fun, and cool people I know. NHSMUN to me is not just a conference, but also an opportunity to catch up with and meet new friends from all around the world!

The two topics at hand are some of the most pertinent and urgent matters on the global agenda, and both [DIRECTOR], the Assistant Directors, and I have prepared a great deal of information and resources for you to have the best preparation possible. As March approaches, please keep researching and staying up-to-date with both topics. Do not hesitate to reach out if you have any questions, concerns, or comments, whether about the committee, the conference, or if you just need someone to talk to. I am very excited to meet you all in March!

Dear Delegates,

My name is Addy Nguyen, and I have the privilege of serving as your director for the 2027 National High School Model United Nations Conference. I am extremely ecstatic to welcome you to the Conference of the Parties of the UNFCCC! During committee, delegates will be able to discuss the expansion of green energy in rural regions as well as examine environmentally friendly manufacturing initiatives.

Currently, I attend the University of California, Santa Barbara, as a second-year undergraduate studying political science. I was a part of Model United Nations throughout my four years of high school. Three years ago, I was a delegate at NHSMUN, getting to deliberate sustainable transportation in Eastern Europe and fostering economic development for refugees. Bridging gaps between differing ideas and fostering an environment of great diplomacy and inclusivity, NHSMUN was an invaluable experience, as it gave me the opportunity to work with other incredible leaders around the world. Thus, I hope you too have an unforgettable and amazing experience at this conference!

During my last year of high school, I had the honor of being a teacher assistant for incoming first-year MUN students at my school. The experience allowed me to pass on the leadership and public-speaking skills I obtained to a new generation of leaders. Due to my immense appreciation and gratitude for the program, I have continued my MUN journey into college. In the Santa Barbara Model United Nations team, I presently serve as the Director of Technology and Design and view the other members as my second family!

Beyond my longstanding interest in researching international topics, I enjoy trying new cuisines and restaurants with my older sister. In my spare time, you can also find me rock climbing with friends, listening to all music genres, and sketching realism. Lastly, I absolutely adore everything about fashion paired with sustainability, usually finding myself sifting through the racks of second-hand stores to add to my colorful closet.

Regarding the factor of sustainability, this committee calls for delegates to bring forth clean solutions in an effort to combat environmental issues. These obstacles include a mass utilization of non-renewable and harmful energy sources, which can lead to other challenges such as climate change, health issues, and pollution. Please do not hesitate to reach out with any questions or concerns. I am looking forward to meeting everyone and getting to see thoughtful discussion and diplomatic collaboration for the preservation of our Earth!

Best regards,

Addy Nguyen
